# e-commerce store

The Technology One E-Commerce Store was designed to meet the needs of companies looking for a professional, feature rich, and easy to administer online store solution.

### Customers see a professional, easy to buy-from store that:

- Makes it easy for customers to shop and pay with a customized checkout based on your company's requirements
- Includes multiple fulfillment options such as off-the-shelf, factory direct, and import
- Includes printable catalogs that are updated nightly
- Makes it easy to find products because of multiple category associations
- Makes it easy to register with user self-registration restricted by email domain

### You maintain control with system configuration that allows for:

- Web based store administration
- A customized home page you can update real-time with unlimited products
- Unlimited printable catalogs by category updated nightly
- Custom key words associated to products for effective searching
- Real-Time creation and update of Users, Products, Categories, and Company reporting hierarchies
- Product Image upload with automatic resizing of pictures for consistency
- Fast, easy, flexible and custom reports enable you to manage your store effectively
- Specific configuration for different corporations including up to 10 levels of reporting hierarchies

### Technical integration with your system:

- Supports Credit Cards and Level 2 procurement cards for payment processing
- Supports EDI integration through the SAP Procurement System using the SAP Open Catalog Interface (OCI)
